

AMAN BOHRA

Mechanical Engineering graduate with hands-on experience in SolidWorks and CATIA V5, supported by shop-floor exposure as a Graduate Apprentice Trainee in the Engine Shop at Ashok Leyland. Strong understanding of engine components, manufacturing processes, and design for manufacturability. Eager to contribute as a Junior Mechanical Design Engineer.

LINKEDIN: [AMAN BOHRA](#)

KEY SKILLS

CAD & Design: SolidWorks, CATIA V5, 3D Modeling, Assembly Design, Engineering & Assembly Drawings, BOM Creation, Design Review

Mechanical & Manufacturing: Machine Design, Strength of Materials, Material Selection, Sheet Metal Design, Machining Processes, Casting Processes, Prototyping, Interference Analysis, Basic Stress Analysis (Static)

WORK EXPERIENCE / TRAINING

Ashok Leyland

GAT (Graduate Apprentice Trainee) | Mar 2025 – Mar 2026

- Graduate Apprentice Trainee in Engine Shop supporting diesel engine assembly and inspection.
- Assisted in component assembly, dimensional inspection, and quality checks.
- Followed SOPs, safety norms, and lean manufacturing practices.
- Gained hands-on exposure to engine manufacturing processes and shop-floor operations.
- Maintained production and inspection records for traceability and audits.
- Coordinated with maintenance teams during breakdowns and preventive maintenance activities.

SolidWorks Training – Internshala e-Education | Mar 2023 - Aug 2023

- Designed and modeled mechanical components using SolidWorks with focus on functionality and manufacturability.
- Created 3D part models, assemblies, and 2D engineering drawings as per design requirements.
- Performed assembly mating, interference checks, and basic design validation.
- Developed prototypes and evaluated design feasibility through iterative improvements.
- Coordinated with simulated manufacturing constraints to ensure design suitability for production.

CATIA V5 Training – Skill-Lync | Sep 2024 - Feb 2025

- Created detailed 3D CAD models of mechanical components using CATIA V5 (Part Design & Assembly Design).
- Generated 2D drawings with dimensions and tolerances for manufacturing reference.
- Supported assembly modeling and verified component fitment and alignment.
- Participated in design reviews and implemented feedback to improve component design.
- Assisted in prototyping, assembly, and basic testing of designed components.

EDUCATION

Graduation : B.Tech(Mechanical Engineering) | BTKIT (UTU) | 2020-2024 Percentage : 62%

Senior Secondary School : 12th Grade | CBSE | 2019-2020 Percentage : 73%

PERSONAL INTERESTS / HOBBIES

- Cricket and Football
